

Sample Document for RAG Practice

This is paragraph 1. Artificial Intelligence (AI) enables machines to perform tasks that typically require human intelligence. Retrieval-Augmented Generation (RAG) combines information retrieval with large language models to produce accurate, context-aware answers.

This is paragraph 2. Artificial Intelligence (AI) enables machines to perform tasks that typically require human intelligence. Retrieval-Augmented Generation (RAG) combines information retrieval with large language models to produce accurate, context-aware answers.

This is paragraph 3. Artificial Intelligence (AI) enables machines to perform tasks that typically require human intelligence. Retrieval-Augmented Generation (RAG) combines information retrieval with large language models to produce accurate, context-aware answers.

This is paragraph 4. Artificial Intelligence (AI) enables machines to perform tasks that typically require human intelligence. Retrieval-Augmented Generation (RAG) combines information retrieval with large language models to produce accurate, context-aware answers.

This is paragraph 5. Artificial Intelligence (AI) enables machines to perform tasks that typically require human intelligence. Retrieval-Augmented Generation (RAG) combines information retrieval with large language models to produce accurate, context-aware answers.
